Vorwort

Für die Vereinigung der rein geographischen Übersichtskarten in einem besonderen Utlasband sprach die redaktionelle Ersahrung ebenso wie der Wille, einem oft geäußerten Wunsch der Leser entgegenzukommen. Der Utlasband, der als 12. Band in "Meyers Lexikon" einzureihen ist, erscheint im Anschluß an den 1. Band des Werkes. Das ersordert eine kurze Begründung und Erläuterung. Der Atlas ist als rein praktisches Hilfsemittel gedacht, um die im Lexikon genannten Begrisse, Orte usw. geographisch richtig und schnell einzuordnen. Es werden dagegen alle solche Karten, die Probleme zur Darstellung bringen, nicht im Atlasband, sondern im Werksen Eerscheinen. Auch alle historischen Karten werden aus diesem Grunde den Textbänden eingegliedert.

Es kommt hinzu, daß der äußere Rahmen des Atlasbandes bei Aufnahme aller Karten, also auch solcher, die über die rein praktische geographische Drientierung hinansgehen, leicht gesprengt würde. Senan so wie die zahlzeichen Bildtafeln bei den entsprechenden Stichwörtern stehen, werden auch die "thematischen" Karten bei dem ihnen entsprechenden Thema des Textsandes erstbeinen.

Bur Erleichterung des Gebrauchs wird von jedem geographischen Dres, Länder-, Fluß-, Gedirgs- und Landschaftsnamen aus den Terebänden auf die entsprechenden Karten und Gradneßselder des Atlasbandes verwiesen. Wenn z. B. bei dem bayrischen Städtchen Amorbach (9 A 2) steht, so verweist diese Klammer auf Karte 9, der große lateinische Buchstade auf die Einteilung am oberen und unteren Kande, die letzte Zahl auf die Einteilung am rechten und am linken Kande der Karte. Bei Flüssen mit wiederholten Kamenbezeichnungen auf der Karte erstrecken sich die Verweise oft auf mehrere Gradnehselder, z. B.: Amazonenstrom (32 d B-D 2). Bei größeren geographischen Einheiten wird oft sogar auf mehrere Karten verwiesen: Alfrika (33; 33 A; 33 a; 33 b; 33 c; 33 d; 33 e).

Jede Karte enthält eine Sach: und Zeichenerklärung. Es wird dort erklärt, welche Strichform oder welche Farbe für Straßen: und Eisenbahnen gewählt wurde, welche Bedeutung die einzelnen Flächenzeichen haben u. a. m. Der Leser erkennt auch daraus, daß das Stadtzeichen (einsacher Ring, Ring mit Punkt, Doppelring, schrassierte Fläche) der Größe und dem Rang der Stadt entspricht. In Ergänzung zu den Terkänden ist weiterhin bei einer Unzahl von Karten leicht festzustellen, welche Stadt der Sitz einer Kreise, Provinz- oder Landesbehörde ist.

Alphabetisches Namenverzeichnis

Erklärungen

Zum Aufsuchen eines Namens auf der Karte dienen die an den Rändern der Karten farbig eingedruckten Buchstaben und Zahlen, welche auf die einzelnen durch das Gradnetz gebildeten Rechtecke (Gradfelder) verweisen. Im Namenverzeichnis bezeichnet die dem Namen zunächststehende Zahl die Kartennummer, die Buchstaben und die folgenden Zahlen beziehen sich auf das den Namen enthaltende Gradfeld. Bei den Polarländern bezeichnet die Zahl 3 oder 4 die Karte, die folgenden Zahlen verweisen auf die durch die Längengrade gebildeten Kreisausschnitte. Nebenkarten sind im Register mit Nbk. I, II usw. bezuschnitte.

De Namen großerer Fluser tiebirge, Meere usw. sind Übersichtskarten entnommen, Oris- et Erretten in der Karte auf w. der der Name am besten ersichtlich ist.

O.t. mm: sind nur dann durch den Zusats O. (Ort) erklärt, wenn der Name eine andere Dentung zuläßt, z. B. Auerbach, O.; andere Namen sind durch die unten angeführten Zusätze gekennzeichnet, sobald ihre Eigenschaft nicht schon im Namen selbst ausgesprochen ist, z. B. Tauferer Tal. Rio Negro (Schwarzer Fluß), wobei die nachstehenden fremdsprachigen Erklärungen zu berücksichtigen sind. Gleichlautende Namen sind durch Zusätze in Klammern unterschieden. Zweisprachige Ortsnamen sind unter beiden Schreibungen sufgenommen, z. B. Thorn (Torwh) und Toruh (Thorn).

Vom deutschen Alphabet abweichende Buchstaben fremder Sprachen sind im Namenverzeichnts wie deutsche Buchstaben behandelt, z.B. è wie c. — Für die Namen des Japanischen Reichs (einschließlich Koreas und Formosas) ist die englische Umschreihung angewandt, also zu sprechen: ch = tsch, j = dsch, sh = sch, y - j.

Politische Geschichte der deutschen Grenzen

192 Getten, 12 einfarbige und 7 mehrfarbige Rarten. In Gangleinen gehunden 4,50 RM.

Weit mehr als irgendein anderes Volk ist das deutsche durch sein Grenzschicksal beeinflust worden. Der tragische Zwang, als "Volk der Mitte" immer wieder um den Bestand des Reiches kampsen zu müßen, hat unsere geschichtliche Entwicklung bestimmt. Seit Jahrhunderten sind Deutschlands politische Grenzen durch die seweiligen Machtverhältnisse seiner Nachbarn ständig verschoben worden. Ein Gessamtbild dieser bedeutsamen Borgänge wird hier zum ersten Male von dem Leipziger Dissorter Univ.-Brof. Dr. Baul Arn geboten.

PROF. DR. HEINRICH SCHMITTHENNER

China im Profil

Mit 11 Kartenstige im Tert und 1 großen sechsfarbigen Aberfichtstorie. In Leinen 4,80 RM.

Dier hat einer der besten Kenner Chinas, fest auf dem Boden seiner Wissenschaft stebend, aus seinen Aufzeichnungen und Studien nach Reisen in der Bor-And Nachtriegszeit zusammengefaßt, was für das Verständnis des heutigen China wertvoll ist. Es ift ein leicht lesbares, zugselch sehr ernstes Buch. Es dient der vielleicht wichtigten Aufgabe unsver Zeit, daß die beiden größten Kulturwelten der Menscheit aneinander sich selber erkennen.

Los Angeles

Werden, Leben und Beftalt der Zweimillionenftadt in Schotalifornien. 295 Seiten Tert, 29 Abbildungen auf 16 Kunftdructafeln und 5 Karten. In Gangleimen gebunden 9,50 RM.

Noch in den 1850er Jahren ist Los Angeles ein verstaubtes kleines Städtchen von merikanischem Außeren, das neben dem mächtigen San Franzisko in Kalifornien keine Rolle spielt. Wie verlief die Entwicklung zur Zweimillionenstadt, die heute ein Vielsaches der Stadtstäche Berlins bedeck, in so kurzer Zeit und unter denkbar ungunstigen Voraussehungen? Diese Frage beantwortet der Berfasser in einer eindringlichen Darstellung.

PROF. DR. EDWIN FELS

Der Mensch als Gestalter der Erde

Ein Beitrag jur allgem. Wirticafte und Verfehregeographie. 206 G. in Ganzleinen 5,80 R.M.

Wir betrachten die Landschaft meist als etwas Gegebenes und vergessen leicht, daß die harte Arbeit des Menschen die einst unberührte Natur in startem Maße umgewandelt hat. Die Rüdwirkungen des Menschen auf die Natur wurden bisher wenig beobachtet und sind noch nie zu zusammenfassender größerer Darsstellung gebracht worden! Diese wichtigste geographische Gegenwartsarbeit hat sich Prosessor Fels in dem vorliegenden Buche zur Aufgabe gestellt.
